High-Pressure Collet Flushing

High-pressure collet flushing: Service tuning kit
Achieve an increased investment and process reliability with the service tuning kit from Pfiffner.
It allows you to produce and turn parts with a low level of chipping. Because of the increased lack of chips in the production process, you achieve top precision and flexibility. An individual retrofit is possible at each station and machine.

Your benefits

- Fewer chips in the collet
- Fewer impressions on produced parts
- Reliable turning
- Reliable production

Your requirement

- No chips in the collet
- Production parts without chips
- No chips when turning
- A greater overall process reliability

Our solution

- **Pfiffner high-pressure collet flushing**
- Can be individually retrofitted at each station and at each machine
