

REPAIR-EXPRESS

Overhaul for a Longer Machine Life

Your requirement

- Machine has to be repaired/overhauled
- Machine downtimes are supposed to be reduced significantly
- You cannot afford to lose machine capacities
- Time is money!

Our solution

- Pfiffner Repair-Express – the efficient rejuvenation treatment for Hydromat®-Rotary Transfer Machines
- Overhaul directly on site
- In addition to the proven ReVest® in-plant overhaul

Your benefits

- No disassembly of machines necessary
- Partial overhaul with minimal and planable machine breakdown
- Fast complete overhaul through precise scheduling (generally only 2-6 weeks of downtime)

Services

- Overhaul of all machining units and valves at works
 - Overhaul of rotary table as well as of collet table
 - If required, replacement of double hexagonal or 16-edge block
 - Overhaul of hydraulics system
 - Overhaul of loading magazine
 - Overhaul of coolant system
 - Replacement of electrical elements and hydraulic hoses with new certification
 - Commissioning with test runs in your plant
- Options in the context of Repair-Express
- Modification of spindles to voltage HSK or TENDO Turn
 - Electrical (software) update
 - Retrofitting to CNC technology
 - Set-up of new motor types with high energy efficiency
