Retrofit solution for Siemens controls 805

The Hydromat[®] CNC stand alone-machining unit (factory revised*)

Why the retrofit solution?

- After more than 20 years of the operation of Siemens 805 at Pfiffner, we will have to cancel the mentioned service features for the control types mechanically and service-sided by the end of 2020.
- The reasons are many-sided. Among others, spare parts or individual components of the manufacturer will not be available anymore.
- Furthermore, through a generational change of our employees, we are no longer able to keep alive the service for this technology.

Your solution for the future:

- Hydromat[®] CNC stand alone-machining unit with side cabinet.
- Promotion price, incl. Installation and Training for CHF 72'900.--, time limit: until 31.08.2020.
- Paying by instalments (CHF 77'000.--) as possible option CHF 41'000.-- down payment / monthly 12 á CHF 3'000.--.
- First deposit due 30 days after installation.

*Basis is an exchange unit, factory revised

Right of technical modification reserved 05/2020
